1. **The Ante:** Players position an initial wager before the round begins.
2. **The Throw:** Players choose Rock, Paper, or Scissors within a strict time frame (normally 5 to 10 seconds).
3. **The Resolution:**
    - **Rock squashes Scissors** (Rock wins)
    - **Scissors cuts Paper** (Scissors wins)
    - **Paper covers Rock** (Paper wins)
4. **The Payout:** A win typically pays 1:1 minus a cottage commission (similar to Baccarat), while a tie either leads to a pressed bet or activates a sudden-death tiebreaker round.

Standard Payouts and House Edges

To comprehend why casinos offer Rock Paper Scissors, one need to take a look at the mathematics. In a simply theoretical game, the chances of tossing any of the three signs are equal (33.3% opportunity each). Nevertheless, human psychology alters these statistics, and casinos carry out specific rules to protect their profit margin.

Bet Type Result Standard Payout House Edge **Standard Win** Gamer beats House 1:1 (Even Money) ~ 2.5% to 5% (by means of tie rules) **Tie/ Push** Gamer and House match Cash returned Differs **Precise Match Side Bet** Forecasting *how* you win Up to 5:1 ~ 7.1% **Streak Bonus** Winning 3 rounds in a row Approximately 10:1 ~ 6.5%

As shown in the table above, the house edge is primarily maintained through how ties are handled or through enticing side bets that carry higher volatility and lower gamer returns.
