When you run a home service business, your website needs to do a job. It should look good on a phone, make it easy for people to call, and help you catch leads without extra back and forth. That is the focus at Scalable Websites, a veteran-owned website design company based in Montgomery, TX.

Founded in January 2025, the company builds and manages mobile-first websites for contractors, home service businesses, and local small businesses. Owner Preston Toor leads a team that brings 10+ years of experience and 200+ websites built for home service businesses. If you are looking for a website designer in Montgomery TX, the approach here is practical. Build a site that works for the way local service businesses actually get calls, schedule jobs, and follow up with customers.

Built for contractors and local service businesses

A lot of small business website design sounds good on paper but misses what matters day to day. Contractors need a site that answers basic questions fast, works well on mobile, and helps turn visits into calls and form submissions.

Scalable Websites works with trades like roofing, HVAC, plumbing, fire protection, fencing, concrete coatings, pools, septic, landscaping, remodeling, **web design montgomery tx** general contractors, and 30+ more. That matters because contractor website design is different from building a site for a restaurant or an online store. A service business website **website designer montgomery tx** needs to support real-world lead flow.

Every website includes the basics that help a local service business operate better:

- Click-to-call
- Google reviews shown on the site
- Custom lead forms with instant text and email alerts
- On-page SEO from day one
- Hosting and security

Those features are included because they support how customers shop for local services. Many people are searching on their phones, comparing a few businesses, and deciding quickly who to call.

Options for new sites, redesigns, and ongoing support

Some businesses need a simple starting point. Others need a bigger build or a full website redesign. Scalable Websites offers custom web design, custom WordPress websites, website redesign, and website maintenance.

There are three plan levels. The Starter plan is $95 a month for a single-page site. The Growth plan is $195 a month for a 3 to 5 page site, and it also includes missed-call text-back, unlimited lead follow-up, Search Console, and Google Analytics. The AI Enhanced plan is $295 a month for 10+ pages, blogging, priority support, AI SMS and chat, and SEO citations.

Every plan has a 6-month minimum, then goes month-to-month. The client owns the site after 36 months. There is also a free design refresh every 36 months and a 30-day money-back guarantee on signup.

For many local businesses, that setup is straightforward. You know what is included, you know the monthly cost, and you know the site is built to support incoming leads.

Website maintenance that covers the basics business owners need

A website is not a set-it-and-forget-it tool. It needs regular attention to stay secure, updated, and online. That is why website maintenance is part of the service lineup.

Maintenance includes unlimited update requests, security updates, uptime monitoring, daily offsite backups, and a dedicated project manager. For a contractor or small business owner, that can remove a lot of hassle. If something needs changing, there is a process for it. If the site needs routine upkeep, it is covered.

That kind of support is especially useful for businesses that do not have time to log into WordPress, track updates, or watch for issues. Instead of treating the website like a side project, it becomes part of the business infrastructure.

Serving Montgomery County and the greater Houston area

Scalable Websites is a service-area business, not a walk-in office. The company meets clients in person across Montgomery County and greater Houston, including Montgomery, Magnolia, The Woodlands, Conroe, Willis, Spring, Tomball, Cypress, Kingwood, Humble, Houston, Katy, and Sugar Land.

If you are searching for web design Montgomery TX or web design The Woodlands, that local service area is worth noting. The company is built around meeting businesses where they are and helping them put a better web presence in place.

The business is open Monday to Friday, 8 AM to 5 PM, and can be reached at (832) 979-2478. It also holds a 5.0-star Google rating.

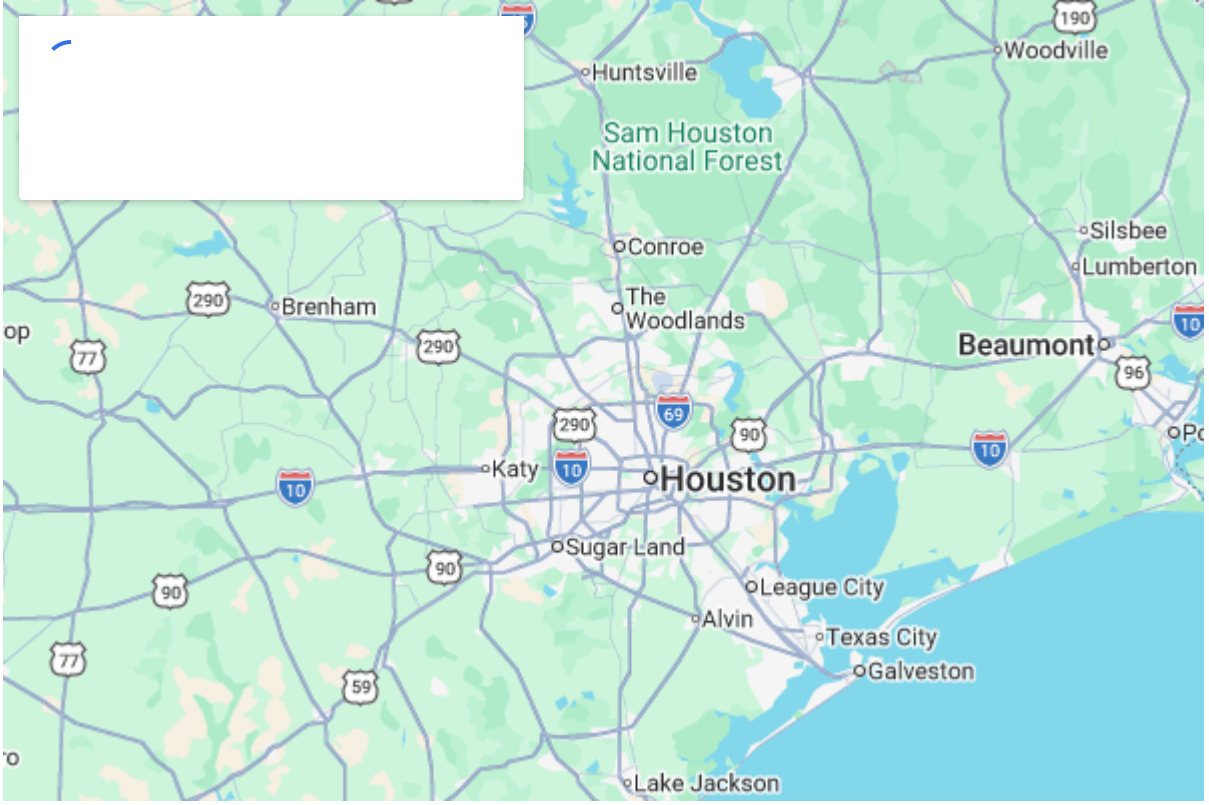

For contractors and small businesses, the value of a website often comes down to simple questions. Does it look professional on mobile. Does it make calling easy. Does it show reviews. Does it alert you when a lead comes in. Does someone maintain it so you do not have to think about it. That is the lane Scalable Websites stays in.

Whether a business needs a first site, a website redesign, or steady website maintenance, the offering is centered on tools that support local lead generation and day-to-day operations for service businesses.
