- **Medium Mode:** Often a 3-tile wide grid with two traps per row, or a 4-tile grid with several traps. This uses a well balanced danger profile.
- **Tough/ Expert Mode:** Features narrow paths with a high concentration of traps. While very harmful, arriving yields astronomical multipliers.

2. Multiplier Progression

As the player ascends row by row, the mathematical multiplier substances. The precise progression depends upon the picked difficulty and the overall number of rows (usually ranging from 8 to 10 rows per tower).

Row Level Easy Mode Multiplier (Approx.) Difficult Mode Multiplier (Approx.) **Row 1** 1.15 x 1.50 x **Row 3** 1.52 x 3.37 x **Row 5** 2.01 x 7.59 x **Row 7** 2.65 x 17.0 x **Top Row** 4.60 x 85.0 x+
