The main goal of the video game is simple: players place wagers on which sector the wheel will stop on after a spin. Nevertheless, what sets Crazy Time apart from standard wheel video games (like *Dream Catcher*) is the inclusion of a **Top Slot** and **4 interactive perk games** that deal enormous payout potential.

How a Round of Crazy Time Works

Every round of Crazy Time follows a structured, busy series:

1. **The Betting Phase:** Players are given a minimal timeframe (normally around 15 seconds) to position their chips on several of the readily available wagering areas on the virtual layout. Gamers can bet on numbers,

bonus rounds, or a mix of both.

2. **The Top Slot Spin:** Simultaneously while bets are being placed, a two-reel fruit machine positioned straight above the primary wheel spins automatically. The left reel exposes a bet area (number or reward), and the ideal reel exposes a multiplier (ranging from 2x up to 50x). If the bet spot and multiplier align, that multiplier is applied to the segment for the upcoming spin.
3. **The Main Wheel Spin:** The live host spins the physical wheel.
4. **The Outcome:** When the wheel concerns a total halt, the guideline indicates the winning section.
 - If it arrive at a **Number**, all players who wager on that number get a payout according to the chances, multiplied by any Top Slot multiplier if suitable.
 - If it arrive at a **Bonus Game**, the game shifts to a separate, immersive reward round.

Dive into the Four Bonus Rounds

The piece de resistance of Crazy Time is certainly its 4 perk features. These minigames use the most significant win capacity and transport players into entirely different virtual environments.

Whichever side lands face up wins for the gamer. If the multipliers are low, a "Rescue Flip" can often be set off for a 2nd possibility at greater multipliers.

2. Money Hunt

- **Frequency:** 2 sectors on the wheel.
- **How it works:** Players are provided with a huge screen showing 108 random multipliers concealed behind shooting gallery targets (such as a rabbit, a chef hat, a cactus, and so on). A countdown timer starts, and each player needs to aim and fire a virtual cannon at the target of their option. When time expires, all targets reveal their covert multipliers, and gamers collect the multiplier related to the target they selected.

3. Pachinko

- **Frequency:** 2 sectors on the wheel.
- **How it works:** Inspired by the traditional Japanese arcade game, players are required to a radiant Pachinko wall filled with pegs. The host drops a puck from the top of the board, and it bounces randomly down through the pegs before landing in one of several multiplier zones at the bottom. If the puck lands in a "DOUBLE" zone, all the multipliers at the bottom double in value, and the puck is dropped once again for an even larger payout.

4. Crazy Time

- **Frequency:** 1 sector on the wheel.
- **How it works:** This is the ultimate benefit round. The host strolls through a red door into a surreal, brilliantly colored virtual world including a colossal virtual wheel consisting of 64 sectors and three flippers (Green, Blue, and Yellow). Gamers pick among the 3 flippers before the wheel is spun. The wheel can include

enormous multipliers, "DOUBLE," and "TRIPLE" sections. If the wheel arrive at a double or triple worth, all multipliers increase, and the wheel spins once again, paving the method for the video game's maximum payouts.
