How the Game Works: Core Mechanics

To truly master the skies, a player should first understand the foundational mechanics of the game. While exact functions can differ slightly depending upon the specific platform hosting the game, the universal structure remains consistent.

The Flight Phase

As soon as a round starts, the airplane raises off the runway and starts its climb. As it climbs up, a multiplier counter begins ticking upward-- beginning at 1.00 x and continuing to increase. The longer the flight continues without incident, the higher the multiplier goes.

The Descent and Hazards

The skies are seldom clear. Along the flight path, different components appear that can either boost the gamer's score or too soon end the run. These can consist of favorable tailwinds, fuel increases, storm clouds, or sudden

elevation drops.

Squandering

The defining mechanic of Avia Masters is the aspect of risk versus benefit. Gamers must decide the ideal moment to "squander" or protect their development. Wait too long, and a sudden threat may crash the aircraft, resulting in a lost round. Squander too early, and gamers might miss out on out on enormous multipliers.

Game Phase Description Gamer Action **Pre-Flight** Setting stakes or preparing the airplane for launch. Location initial parameters or start the round. **Climb** The airplane removes; multipliers start to climb. Screen the flight course and watch the multiplier grow. **Mid-Flight** Navigating threats, gathering perks, and evaluating risk. Choose whether to hold on or secure the existing rating. **Resolution** The flight ends either by means of an effective cash-out or a crash. Collect benefits and prepare for the next round.
