The temptation to go after the greatest possible multiplier is strong, but greed is typically fatal.

- Establish a target multiplier for each session based upon existing ability level.
- As climate condition get worse later on in a run, downsize aggressive maneuvers and focus on survival.

3. Find Out the Environment Patterns

Although levels include randomized elements, particular patterns in challenge spawning and wind shifts repeat. Experienced players study these patterns to anticipate where dangers will appear seconds before they emerge on screen.
