Plinko Crypto is an online casino-style game where players wager cryptocurrencies (such as Bitcoin, Ethereum, GBPT, or Litecoin) on the outcome of a falling ball. Unlike standard online slots that rely on intricate reels and paylines, Plinko provides an extremely transparent and busy format.

A player selects a bet amount, picks their danger level, identifies the variety of rows of pegs, and falters. Gravity takes over as the ball rattles down the board, bouncing off pegs until it settles into a multiplier slot at the base. If the ball lands in a high-multiplier slot, the gamer wins a matching multiple of their original bet.

- **High Risk:** The ultimate gamble. The central slots typically result in a net loss (multiplier less than 1x), however the extreme outer edges include massive, life-changing multipliers (often up to 1000x or more).
