How Do CS2 Cases Work?

At their core, CS2 cases are randomized loot boxes consisting of weapon surfaces (skins), sticker labels, music sets, or unusual special items (gloves and knives). To open a case, a gamer requires 2 things:

1. **The Case:** Obtained through gameplay drops or bought from the Steam Community Market.
2. **A Weapon Case Key:** Purchased directly in-game for £ 2.50 GBP (or regional equivalent).

Once a key is utilized on a matching case, a roulette-style animation plays, ultimately landing on a particular item.

The Weekly Drop System

Gamers do not require to spend money to acquire cases. Valve benefits active gamers through the weekly care package system:

- Players level up their CS2 profile by using main servers.
- Upon making the first weekly level-up, gamers exist with a choice of products (usually a mix of weapon drops and/or cases).
- Active Duty drop swimming pool cases drop often, while "Rare Drop Pool" cases have a tiny opportunity of dropping (approximately 1% or lower).

CS2 Case Odds and Probabilities

Valve is legally required in certain regions to publish the exact odds of unboxing products of differing rarities. While the specific tier of the weapon skin within a color classification is uniform, the rarity tiers determine the baseline possibilities.

Product Rarity Tier Approximate Drop Rate Example Items **Mil-Spec (Blue)** ~ 79.92% Common base weapon skins **Restricted (Purple)** ~ 15.98% Uncommon skins with noticeable style modifications **Categorized (Pink)** ~ 3.20% Rare, extremely in-depth skins **Covert (Red)** ~ 0.64% Premium flagship skins for the case **Exceptionally Rare (Gold)** ~ 0.26% Knives or Special Gloves

*Note: There is a different, independent 10% chance that any opened item will remain in **StatTrak** condition, which tracks the number of kills made with that weapon.*
