However, casinos present a minor disparity to protect their company design, called the **House Edge**.

Metric	Real Mathematical Value	Typical Casino Implementation	Possibility of Heads	50.00%	50.00%	Probability of Tails	50.00%	50.00%	Standard Payout	2.00 x	1.98 x or 1.96 x	Return to Player (RTP)	100.00%	96.00%--98.00%	House Edge	0.00%	2.00%--4.00%

As highlighted in the table above, while the chances of the coin landing on a specific side stay even, the payout is a little lowered, or a little commission (vig) is taken on winning bets. This creates an RTP (Return to Player) of normally in between 96% and 98%, which is rather beneficial compared to many fruit machine, however mathematically favors the home over the long run.
