Deep Dive: The Four Bonus Rounds

The main appeal of Crazy Time lies in its four distinct perk mini-games. When the wheel stops on one of these sections, gamers who have put a bet on that specific bonus are carried into a computer-generated virtual world.

1. Coin Flip

- **Frequency:** 4 sectors on the wheel.

- **How it works:** A simple red and blue coin is flipped by a mechanical arm on the studio desk. Before the flip, each side of the coin is appointed a random multiplier. Whichever color lands face-up wins the multiplier for the participating players.

2. Pachinko

- **Frequency:** 2 sections on the wheel.
- **How it works:** Inspired by the traditional Japanese arcade game, players are taken to a large Pachinko wall filled with pegs. The host drops a puck from the top, and it bounces its way down into among numerous multiplier zones at the bottom. If the puck arrive on a "DOUBLE" slot, all multipliers on the board double, and the puck is dropped once again.

3. Cash Hunt

- **Frequency:** 2 segments on the wheel.
- **How it works:** This is a shooting gallery-style benefit round. A huge screen shows 108 random multipliers concealed behind various symbols (like a cactus, a target, or a sheriff's badge). Players use an on-screen crosshair to choose a single target before a timer runs out. As soon as time ends, all targets expose their covert multipliers.

4. Crazy Time

- **Frequency:** 1 segment on the wheel.
- **How it works:** The ultimate benefit round. The host opens a red door leading into a lively, whimsical virtual world including a huge virtual wheel with 64 segments and 3 flappers (green, blue, and yellow). Gamers select their preferred flapper before the spin. The wheel includes "DOUBLE" and "TRIPLE" segments. If the wheel lands on one of these, all multipliers increase, and the wheel spins again, paving the way for jaw-dropping optimum payouts.

Key Features That Elevate the Game

Crazy Time separates itself from older wheel video games like *Dream Catcher* through numerous innovative mechanics:

- **The Top Slot:** Above the main wheel sits a two-reel mini slot. On every spin, one reel selects a bet spot (number or bonus offer), and the other reel selects a multiplier. If the two line up on the payline, that multiplier is used to the sector for that round. Multipliers can rise to 50x in the base game and even higher inside the reward rounds.
- **High Production Value:** The studio changes perspective, makes use of augmented truth, and features energetic live hosts who connect with chat, keeping the atmosphere vibrant and interesting.
- **Enormous Win Potential:** While basic gambling establishment video games have rigorous payment caps, Crazy Time is well-known for using massive win multipliers, in some cases skyrocketing up to 20,000 x a gamer's stake during the Crazy Time perk round.
