If your iPhone only charges when the cable is held at a certain angle, or you have to wiggle the connector to get that little lightning bolt to appear, the charging port is the likely culprit. It is one of the most common faults a repair shop sees, and it is often fixable for far less than people fear. At Free Fusion in Corby, iPhone charging port repair starts from £19.99, and the team works on both Lightning and USB-C models.

Before assuming the port has failed, try the simple checks. Swap to a different cable and a different plug, because cables wear out and cheap ones can be unreliable. Then look inside the port with a torch. Pocket lint compacts into the bottom of the socket over months, and it can stop the connector seating fully. Gently clearing it with a wooden toothpick, with the phone switched off, often brings a port back to life. Never use metal tools, which can damage the contacts inside.

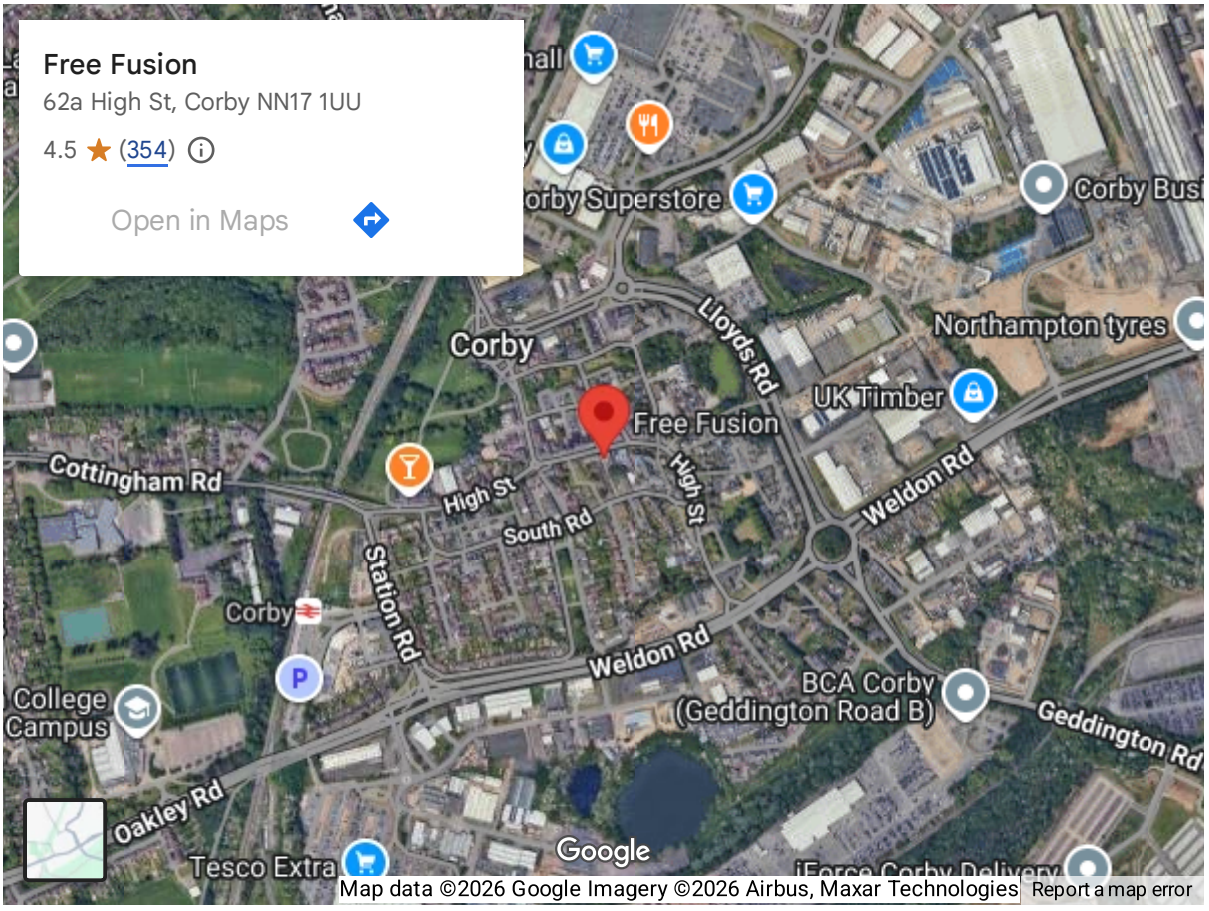

If cleaning does not help, the fault is usually physical. The contacts can wear down after thousands of plug-ins, the Mobile Phone Repair Near Me port can be bent by a heavy handed cable, or moisture can corrode the pins. Symptoms include slow charging, charging that stops and starts, a phone that does not recognise the cable, or a connection to a computer that keeps dropping. A free diagnostic check for local customers can confirm whether it is the port or something else, such as the battery.

Free Fusion | 62a High St, Corby NN17 1UU | 01536 260 558

The range of iPhones covered stretches from the iPhone 5 through to the 17 series, including the SE, which spans the older Lightning connector and the newer USB-C design. The repair is done at the Corby centre on the High Street, and the work is backed by a warranty. Many quick jobs are completed the same day, which matters because a phone that cannot charge has a short shelf life, and nobody wants to be watching the battery percentage fall with no way of topping it up.

While you wait for an appointment, avoid forcing the cable in, and use a charger from a reputable maker. Charging wirelessly can keep you going if your model supports it. People who type mobile phone repair near me when a charger stops working are often relieved to learn that a port repair is a routine job rather than a reason to upgrade, and it is done on site rather than sent away. Back the phone up while it still has power. If you need a charging port repair near Corby, whether you live in the town or in Weldon, Rushton or Gretton, call 01536 260 558 or walk in to 62a High St, Corby, and have it checked.

FAQ About

Mobile Phone Repair Near Me How much does it cost to fix a broken phone? The cost depends on the device and the fault. At Free Fusion in Corby, iPhone screens start from £24.99, batteries from £19.99, charging ports from £19.99 and back glass from £50. Local customers also get a free diagnosis, so you know exactly what is wrong before you commit to a repair. How can I trust a phone repair shop? Look for a shop with a visible track record, a real address you can walk into and repairs that come with a warranty. Free Fusion has more than a decade of repair experience, a shop at 62a High St in Corby and a 4.7 out of 5 rating on Trustpilot from almost 500 reviews. Ask any shop to explain the fault in plain English before they start, and call us on 01536 260 558 if you want to check anything first. Where is the best place to get an iPhone repaired? The best place is a specialist that does the job properly, quickly and at a fair price. Free Fusion is an independent repair centre on the High Street in Corby, and most iPhone screen and battery replacements are done within about an hour while you wait. We are an independent repair specialist, not an Apple Store, and common repairs such as batteries and charging ports start from just £19.99. Can a water damaged phone be fixed? Often it can, but speed matters. Switch the phone off, do not charge it and bring it to a repair centre as soon as you can. Free Fusion offers water damage diagnosis and liquid recovery from £9.99, and local customers in Corby get a free diagnosis so you know where things stand. Do you offer same day mobile phone repair in Corby? Yes, most repairs at Free Fusion are completed the same day. Common jobs such as screen and battery replacements usually take about an hour, so you can often walk in, wait and leave with a working phone. Call 01536 260 558 to check availability for your model. Do I need an appointment for a phone repair near me in Corby? No, we offer a walk in service at our centre at 62a High St, Corby, open on weekdays and Saturdays. If you would like to check we have your part before you travel, a quick call to 01536 260 558 is the best way to be sure. What phones and devices can Free Fusion repair? We repair iPhones from the iPhone 5 up to the 17 series, plus iPads, Apple Watches, MacBooks and laptops. We also work on Samsung Galaxy, Google Pixel, Huawei, OPPO, OnePlus, Sony, Nokia, HTC and Honor handsets. If your device is not on that list, give us a ring and we will tell you honestly whether we can help. Can I send my phone for repair if I do not live in Corby? Yes. Free Fusion offers a postal repair service across the UK using Royal Mail and DPD. Posted devices are typically tested and dispatched the same day they arrive, so you are not left waiting long. Is there a warranty on phone repairs? Yes, repairs at Free Fusion are backed by a warranty. Ask the team about the terms for your specific repair when you drop in or call 01536 260 558, and keep your repair receipt safe in case

you ever need it. Do you repair phones for businesses and schools around Corby? Yes, we look after business phones, tablets and school devices as well as personal handsets. Fast turnaround matters when a device is needed for work or lessons, and our same day service helps keep downtime low. We also see customers from Kettering, Rothwell, Desborough, Weldon, Gretton, Oundle and nearby villages.
