

A dental abscess is a serious infection that requires prompt attention, and Whites Dental Marble Arch treats abscess cases as an urgent priority given the potential for the infection to spread. Symptoms of an abscess include severe throbbing pain, swelling in the face or gum, and sometimes fever, all of which warrant contacting the practice for an emergency appointment. Treatment for an abscess typically involves draining the infection and may include antibiotics, with further treatment such as [emergency dentist near me](#) a root canal or extraction depending on the underlying cause.
