Traditionally, online platforms permitted users to acquire and open virtual cases containing random digital items (such as weapon skins, knives, or unusual collectibles) with the hope of pulling something worth more than the case's purchase price.

A Case Battle takes this principle and turns it into a competitive match. Multiple gamers (usually between 2 and 4) pool their resources to purchase into a shared lobby. Each individual opens the specific same series of virtual cases at the same time. The gamer-- or team-- with the highest total product worth wins the entire contents of the battle.

3. **The Unboxing Phase:** Once all slots are filled, the battle begins immediately. The screen shows the rolling cases for all individuals side-by-side.
4. **Item Reveal:** The cases stop spinning, revealing the items won by each gamer in real-time.
5. **Identifying the Winner:** The platform tallies the market value of every item dropped during the session. The participant whose aggregate loot holds the greatest value is declared the winner and receives all items

dropped by all players in the battle.
