Vinton has its own small town character on the eastern side of Roanoke, with tree lined streets, older brick homes, newer developments toward the Blue Ridge Parkway and a strong sense of community. Pest problems here look a lot like the rest of the valley, but local knowledge https://telegra.ph/Summer-Pest-Control-Roanoke-Humidity-Ants-Wasps-and-Crickets-11-21 still counts. Perdue Exterminators has served Vinton homeowners and businesses for years from its office on Old Cave Spring Road, offering general pest control and specialty services under one family owned roof.

Homes near Glade Creek and Tinker Creek tend to see more moisture related pests, such as camel crickets, cockroaches and carpenter ants. Properties backing onto wooded hillsides deal with mice, spiders and stinging insects. Older homes in the heart of town often have crawl spaces and original framing, which makes termite inspection and prevention a smart investment for any owner planning to stay for the long haul.

Perdue's service list fits these needs closely. Termite elimination comes with renewable annual warranties, bed bug work begins with a free inspection and consultation, and rodent control relies on baits and traps that do not use toxic poisons. Ant, spider, cricket, cockroach and flying insect control round things out, along with insect identification for anything unfamiliar.

Small Enough to Know You

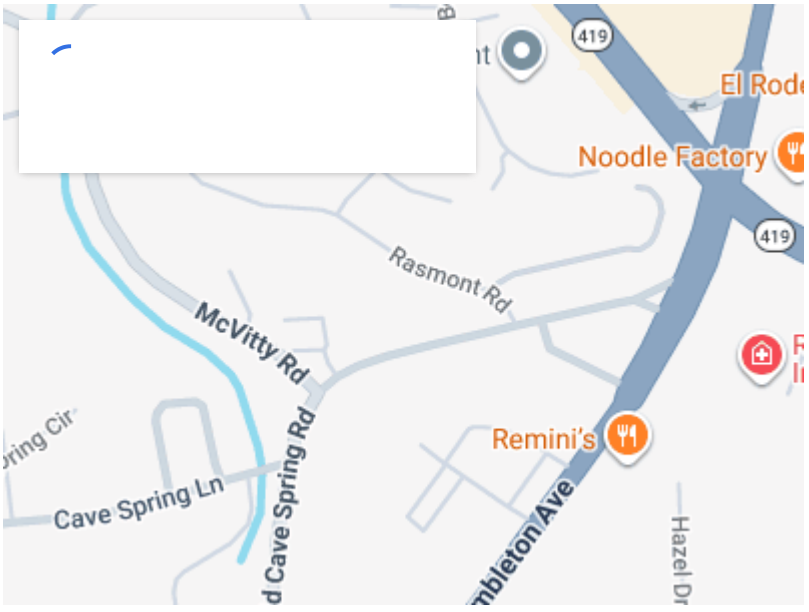

The company motto, large enough to serve you, but small enough to know you, sums up why many Vinton residents prefer a local exterminator over a national chain. Instead of a call center and a rotating schedule of unfamiliar technicians, customers deal with a small team that has spent decades working in Roanoke Valley homes. That continuity means your technician remembers where the ants came in last year and what was done about the damp corner of the basement.

Perdue also supports home sales in Vinton with wood destroying insect reports, water testing and septic inspection reports. For buyers moving into older homes, a professional inspection can reveal termite damage or moisture problems that a quick walkthrough would miss, and treatment can be arranged before closing if needed.

Seasonal changes in Vinton follow the valley pattern closely. Spring termite swarms, summer ants and wasps, early fall crickets and late fall mice all arrive on schedule. Regular service timed around those shifts keeps problems small and manageable, and the family owned team will explain what to expect at each point in the year.

To schedule pest control in Vinton, VA, call Perdue Exterminators at (540) 989-8188. The office at 4323 Old Cave Spring Rd, Roanoke, VA 24018 serves Vinton, Roanoke, Salem, Smith Mountain Lake and the surrounding area.

FAQ About Pest Control Company Roanoke

How do I choose a pest control company in Roanoke?

Look for licensed exterminators, a long local track record and a company that inspects before it treats. Perdue Exterminators has served the Roanoke Valley since 1969, is still family owned and keeps a small team of long serving technicians who inspect each home's environment and construction before recommending treatment. Call (540) 989-8188 to talk it through.

How much does pest control cost in Roanoke, VA?

Cost depends on the pest, the size of the home and how established the problem is, so an inspection gives the most accurate answer. Perdue Exterminators offers free estimates on termite work and a free inspection and consultation for bed bugs, and the company lists reasonable rates among its priorities. Call (540) 989-8188 for a quote.

Are termites common in Roanoke, Virginia?

Yes. Eastern subterranean termites live in the soil across the Roanoke Valley, and humid summers, clay soil and damp crawl spaces give them ideal conditions. Swarms usually appear on warm spring days after rain. Perdue Exterminators has treated termites in local homes for more than five decades.

Do termite treatments come with a warranty?

At Perdue Exterminators, termite elimination comes with renewable annual warranties. Renewing each year keeps a professional inspecting the home and keeps protection in place, which suits a region where termite pressure returns every season. A documented warranty can also help when you sell your Roanoke home.

How can I tell if I have bed bugs?

Common signs are itchy bites in lines or clusters, small dark spots on sheets and mattress seams, and tiny reddish brown insects around the bed frame or headboard. Because other insects look similar, Perdue Exterminators starts every bed bug case in Roanoke, Salem and Vinton with a free inspection and consultation to confirm the problem first.

Can mice be removed without using poison?

Yes. Perdue Exterminators describes itself as a humane, eco friendly rodent control company and uses baits and traps that do not rely on toxic poisons. Technicians also find and seal entry points such as gaps around utility lines and crawl space vents. The company advises calling as soon as you notice rodents, before they multiply.

When is pest season in Roanoke?

Pests are active most of the year in the Roanoke Valley, just in different forms. Spring brings termite swarms and ants, summer brings wasps, crickets and roaches, and fall brings mice and overwintering insects as nights cool. Year round service from Perdue Exterminators is timed around those seasonal shifts.

Do I need a termite inspection to buy a house in Virginia?

Many lenders ask for a wood destroying insect report, and most buyers want one either way. Perdue Exterminators prepares these reports for Roanoke Valley home sales and also offers water testing and septic

inspection reports for properties on wells and septic systems. Call (540) 989-8188 to schedule before your closing deadline.

What areas does Perdue Exterminators serve?

Perdue Exterminators serves all areas of Roanoke, Salem, Vinton, Smith Mountain Lake and the surrounding communities. The office is at 4323 Old Cave Spring Rd in the Cave Spring area of southwest Roanoke County, where the family has been based since the early 1980s.

Why are there so many crickets in my basement?

Camel crickets thrive in damp basements and crawl spaces, which are common in older Roanoke homes with stone or block foundations. Reducing moisture with a dehumidifier and repaired gutters helps a great deal. Perdue Exterminators provides cricket extermination and also helps eliminate and control crawl space mold caused by the same dampness.

Is a local pest control company better than a national chain?

A local company usually means familiar technicians, a local office that answers the phone and real knowledge of area housing and pest patterns. Perdue Exterminators has a technician who has been with the company since 1980, and its motto is large enough to serve you, but small enough to know you.

How long has Perdue Exterminators been in business?

S.G. Perdue founded the company in 1969, starting out of his house and the trunk of his car. His son Andre later joined the business, and today it is led by owner and President Jeff Hudson. It remains a family owned pest control company serving Roanoke.
