What is Mystery Mines?

Mystery Mines is a digital adaptation of the traditional "Minesweeper" principle, reimagined for the modern-day video gaming era. Unlike the historical video game where the goal was to clear a grid without striking a mine, Mystery Mines permits players to set their own danger criteria. Players place a stake and browse a grid filled with covert tiles. Behind these tiles lie either multipliers (gems, coins, or gold) or mines.

The objective is basic: expose as numerous multipliers as possible without clicking a mine. Each successful click increases the player's prospective payout, while hitting a mine results in the loss of the existing stake. The core appeal of the game lies in the "squander" mechanic, which enables players to secure their earnings at any minute before proceeding to the next tile.

How the Game Mechanics Work

The game depends on a Provably Fair algorithm, ensuring that the positioning of mines is randomized and verifiable. When a round starts, the server produces a grid-- usually 5x5-- and disperses a fixed number of mines across it. The player then communicates with the grid in the following series:

1. **Setting the Parameters:** Before the first click, the gamer selects their bet quantity and the number of mines they want to consist of in the grid (e.g., 1 to 24 mines in a 25-tile grid).
2. **The Reveal:** The gamer clicks a tile. If it is a multiplier, the balance increases, and the gamer can select to "Cash Out" or continue.
3. **The Risk:** If a mine is activated, the round ends immediately, and the stake is forfeited.
4. **The Multiplier Growth:** The more mines selected at the start, the higher the multiplier for each effective tile opened.

Understanding Risk vs. Reward

The table below illustrates how different mine counts affect the potential development of a gamer's initial stake.

Number of Mines	Multiplier (Tile 1)	Multiplier (Tile 5)	Multiplier (Tile 10)
1 Mine	1.04	1.22	1.55
3 Mines	1.13	1.85	3.65
5 Mines	1.23	2.80	9.80
10 Mines	1.53	8.80	115.00
20 Mines	4.80	320.00	N/A (Game over)
