The main objective is simple yet profoundly difficult: introduce the airplane, navigate through the skies, gather multipliers and fuel boosts, and money out-- or reach the location-- before the inevitable occurs. Human emotion-- particularly greed and panic-- is a pilot's worst enemy. Setting a predefined auto-cashout limitation takes the emotion out of the formula. Select a target before the engine roars to life, and let the system carry out the landing.

3. Bankroll and Resource Management

Dealing with every session with a set limitation prevents careless decision-making. If a series of flights ends too soon due to unexpected weather condition threats, taking a break is typically the smartest tactical relocation.
