The main goal for the player is simple: place a couple of bets before the round begins, see the aircraft remove, and cash out before the plane undoubtedly flies away. If a gamer successfully cashes out before the crash, they win their original bet increased by the current coefficient. If the aircraft flies away-- or "crashes"-- before they cash out, the bet is lost.

Unlike standard slots where the outcome is figured out completely by an undetectable reel spin, Aviator offers gamers a sense of company. The gamer decides *when* to collect their winnings, turning every round into a test of nerve and ***Aviator*** timing.
